Health Community News

Welcome

We are delighted to share our first health community round-up with you. We hope that you find some useful and fascinating insights in this newsletter and would really love to hear your feedback on how we can make it even more relevant and useful to you moving forward.

The last few months have been an interesting time in health as personal data is rising up the agenda. We're looking to bring together the various lessons and engagements across the health community to facilitate and help lead the conversation about the role of personal data in health.

The future is now for personal data in health

As the momentum and urgency around privacy continues to accelerate, along with the technology needed to make it real, we examine the state of play in the personal health data landscape – where we are, what's coming next and what we still need to happen.
